

NETPLER

DISPOSABLE SKIN STAPLER

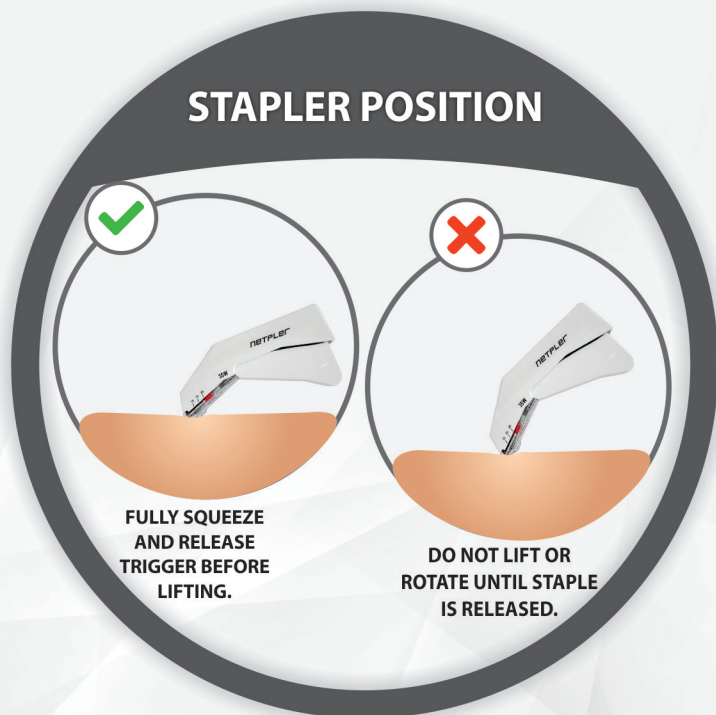

NETPLER is a surgical device for skin closure. It is ready to use sterile disposable single use skin stapler. Netpler is pre-loaded with 35 wide staples which are made of high quality Stainless Steel. The staples are fired with the press of the hand lever. Audible feedback is heard with the fire of the staple pins. The wide nature of the staples give larger crown length and enhanced leg length for better affirmation & cosmesis.

NETPLER because of its angulation & ergonomic design provide precise, reliable and easy skin closure in all operative cases.
